

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Idhā kāna aḥadun yarā, anna fi l-islāma yaşilu ḥubbi l-llāh li l-mu'minīna faqaṭ, fa hādha khaṭa'un tamāman.

If someone thinks that in Islam only the believer is loved by God, then this is quite wrong.

Fa kullu insānin ya'khudhu naşibahu mina ḥubbi l-llāhi ka wāḥidin min khalqih, wa l-ḥubbu faqaṭ huwa sirru wujūdih.

Every human being takes his share in God's love as one of his creatures, and love alone is the secret of his existence.

Wa hādha yaṇṭabiqu 'alā l-insi wa l-jinni wa l-ḥaya-wānāti wa n-nabātāt, wa 'alā kulli makhluqin ḥattā dh-dharra.

This is true for humans, jinns, animals and plants, for the whole creation, even for every single atom.

Su'ila Albert Einstein, al-fizyā'i l-almānī l-mashhūr marra, mā hiya l-quwwatu l-latī taj'alu l-aliktrūnāt tadūru ḥawla nawāti dh-dharra? Fa lam yastaṭi' an yujīb. — Wa shaykhuna qaḍdasa l-llāhu rūḥahu awḍaḥa lanā marra:

Albert Einstein, a famous physicist from Germany, was once asked what kind of force made the electrons revolve around the atomic nucleus. He could not answer it. — Our Sheikh, may Allah sanctify his soul, once explained it to us:

Annahu l-ḥubba l-ladhī waḍa'ahu l-llāhu fi dh-dhar-ra, huwa l-ladhī yaj'alu l-aliktrūnāt tadūru ḥawla n-nawāh. — Mā shā'a l-llāh! — Yastaṭi'u l-insānu an yaqūl: annahā tadhkuru rabbahā wa tusabbiḥuh.

It is the love, Allah has pu into the atom that makes the electrons whirl around the nucleus. — Mā shā'a l-llāh! — You can also say they praise their Lord by making dhikr.

Fa yaḥsun binū an naḥdhū ḥadhwa dh-dharra!

It would be good for us to follow the example of the atoms!

(3:191)

الَّذِينَ يَذْكُرُونَ اللَّهَ قِيَامًا وَقُعُودًا وَعَلَىٰ جُنُوبِهِمْ
وَيَتَفَكَّرُونَ فِي خَلْقِ السَّمَاوَاتِ وَالْأَرْضِ رَبَّنَا مَا خَلَقْتَ
هَذَا بَاطِلًا سُبْحَانَكَ فَقِنَا عَذَابَ النَّارِ ﴿١٩١﴾

Who remember Allah, standing and sitting and lying on their sides, and thinking about the creation of the heavens and the earth: ,Our Lord, Thou hast not created this for nothing. Glory be to You! Beware us from the penalty of fire.
