CHANGING CREATION

In Germany and many other countries, they are
falling victim to a mass delusion: the government and
parts of the people believe they have to force people
to have a „vaccination „, which only has this name,
but in reality is an application of genetic engineering,
which changes a Human Being, the crown of crea-
tion, in his innermost essence, indeed turns him into
a different being.

And Allah JJ let the Shayṭān speak in the Qur'an:

„... and I will certainly command them, and then
they will certainly cut off the ears of the cattle; verily
I will command them, and then they will certainly
change Allah's creation.“ (4:119)

In a first step, Shayṭān commands changing the out-
ward appearance of animals. In a second, he com-
mands an intervention in the innermost part of crea-
tion itself. And this is currently happening worldwide
through „covid vaccination“ genetic engineering,
which is far more dangerous than the virus itself.

We have a duty as Muslims to oppose this. And we
ask Allah to limit the harm of those who have made
the mistake of getting vaccinated.
